

Introduction to BTEC Level 3 National Extended Certificate in Information Technology

Unit 6 – Web Development

In this unit, you will review existing websites – commenting on their overall design and effectiveness. You will use scripting languages such as Hypertext Markup Language (HTML), Cascading Style Sheets (CSS) and JavaScript® and a simple text editor. Finally, you will reflect on the website design and functionality using a testing and review process.

In order to give you an idea of how HTML works we want you to follow the link to w3Schools and work through a range of exercises to learn the basics.
